

IGBT WELDING INVERTER

THE MOST RUGGED, TIME TESTED RELIABLE TECHNOLOGY FOR INDIAN INDUSTRIES

FEATURES :

- ❖ IGBT Inverterised Welding Rectifiers designed to work reliably under severes industrial and climatic conditions.
- ❖ Protections against over voltage / under voltage, over heating, short circuiting etc with Indicators / annunciations.
- ❖ Remote Current Control Facility.
- ❖ Power factor & efficiency over 90%.
- ❖ TIG Welding applications with High Frequency / Lift Arc / Scratch Start.
- ❖ Most reliable, least maintenance.
- ❖ Maximum Power saving (Upto 60%).
- ❖ Replaces Conventional type of rectifiers for all applications.
- ❖ Display for Current and Voltage.

TECHNICAL SPECIFICATIONS

MODEL	SOLARIS 600
Input Supply	3Ph, 400Volts, +20%, -25%, 50/60Hz.
Open Circuit Voltage (V)	75-85
Current Range (A)	6-600
Current @ 60% Duty Cycle (A)	600
Current @ 100% Duty Cycle (A)	462
H. F. Unit	Inbuilt
ARC / TIG Mode	Selector Switch
Enclosure Protection	IP - 23
Class of Insulation	H
Type of Cooling	Suction Cooled
Dimensions	780 x 395 x 510mm
Weight	60 Kgs.
